

Snappy Wallet–Step 3 Expanded

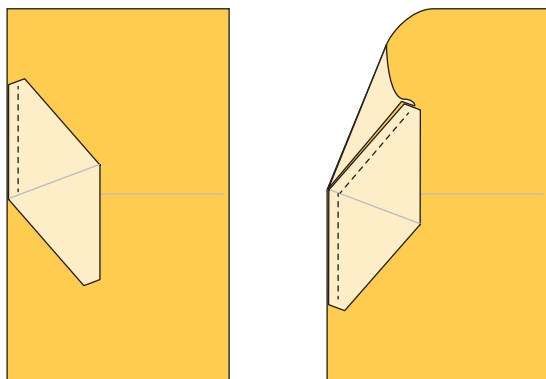

1

- 2 Unfold the pressed pieces and align the angled edge of one gusset with the long edge of the coin pocket, matching the pressed creases.

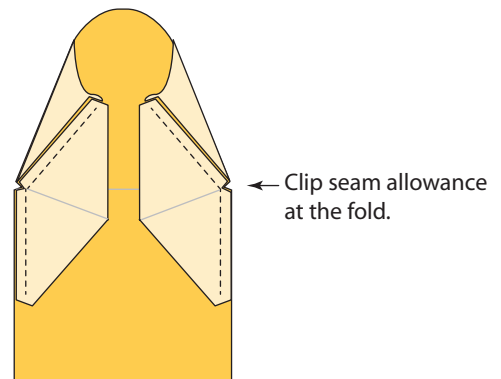

Stitch the first half of the seam along the aligned edge, then align the remaining edge of the gusset and stitch the second half of the seam.

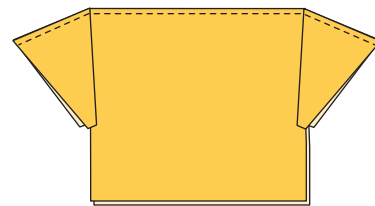

Repeat to join the second gusset to the opposite edge.

- 3 Clip the seam allowances at the fold and press the seam allowances toward the gussets.

- 4 Refold the stitched pieces with wrong sides together and re-press the fold. Edgestitch along the folded edge.

- 5 Position one snap support between the layers of the folded coin pocket. Baste the support in place to one layer of fabric.
